

FTI Technology Recognized as Top Data Visualization Solution Provider by CIOReview

March 30, 2016

Firm's Innovative Visual Analytics Help Find Facts Fast for Investigations, Litigation and Regulatory Requests

WASHINGTON, March 30, 2016 (GLOBE NEWSWIRE) -- FTI Consulting, Inc. (NYSE:FCN), the global business advisory firm dedicated to helping organizations protect and enhance their enterprise value, today announced that its Technology segment has been selected for the *CIOReview's* [20 Most Promising Data Visualization Solution Providers](#) award. The list was compiled by *CIOReview* editors, and includes the companies playing a key role in helping corporations efficiently manage and understand big data using visual analytics. FTI Technology's [Ringtail® e-discovery software](#), and its newly released [Radiance™ visual analytics platform](#), stood out as some of the most innovative data visualization products available on the market.

"Legal teams are increasingly challenged with the timely identification of relevant information for e-discovery and investigations," said [Patrick Strong](#), Senior Managing Director in the Technology segment at FTI Consulting. "The data visualizations in our Ringtail and Radiance platforms enable our clients to find facts fast for any matter, even when navigating large volumes of data and an increasing variety of data types. FTI Technology is honored to receive this recognition from *CIOReview* as recognition for our innovation in the area of data visualization and its ability drive down the time and cost of e-discovery, investigations and compliance."

The [Radiance visual analytics platform](#), launched in January 2016, enables organizations to dynamically investigate and understand their enterprise data. Radiance allows organizations to connect, enrich, analyze and visualize millions of documents from these disparate sources in a single, elegantly designed user interface. With a powerful search engine and a library of advanced visualizations, including social networking, communication patterns, concept clustering and timelines, Radiance can aid organizations in a number of common use cases, including investigations, early data assessment and the identification of high-risk data, such as personally identifiable information ("PII").

The Radiance visual analytics platform provides a natural complement to Ringtail. For data relevant to legal review and production requirements, [Ringtail](#) provides a complete platform for managing the complexity and scope of today's global e-discovery. A full-featured platform, Ringtail software processes and culls data, provides a broad range of tools for quick data review and coding and gives users a comprehensive set of redaction and production tools. Ringtail also features world-class visual analytics, concept clustering, predictive coding and advanced workflows.

FTI Technology has received numerous honors from the legal and IT industries for software innovation, including selection by [The National Law Journal](#), [The Legal Intelligencer](#), [The Recorder](#) and [KMWorld](#), as leaders within e-discovery software and services. FTI Technology was also included in the 'Leaders' quadrant of Gartner's 'Magic Quadrant for E-Discovery Software' report (Jie Zhang, Garth Landers, May 18, 2015); and Gartner has given the company the highest product score for its [Ringtail® e-discovery software](#) in the Legal Review Use Case in [Gartner's 'Critical Capabilities for E-Discovery report](#) (Jie Zhang, Garth Landers, October 6, 2015).
