Radiance Visual Analytics Platform Wins Computer Technology Review's MVP Award

August 25, 2016

Judges Recognize FTI Consulting's Innovation in Visual Analytics

WASHINGTON, Aug. 25, 2016 (GLOBE NEWSWIRE) -- FTI Consulting, Inc. (NYSE:FCN), the global business advisory firm dedicated to helping organizations protect and enhance their enterprise value, today announced its FTI Technology segment has received a Most Valuable Product ("MVP") award for its Radiance™ visual analytics software platform in the Big Data category from *Computer Technology Review* ("CTR").

As one of a select number of IT products and companies to secure CTR's MVP award, Radiance stood out to the judges for its innovation and vision in addressing big data challenges. CTR's editorial panel selected winners based on rigorous judging criteria that included product innovation, functionality and affordability.

"New collaboration apps, remote employees and low-cost storage in the cloud are making it easier for organizations to work quickly and from anywhere. However, they are causing nightmares for corporations charged with collecting and acting upon that data for any sort of legal or regulatory matter," said Eddie O'Brien, a Senior Managing Director in the Technology segment. "By connecting with these new data sources and representing the data with visual analytics, Radiance helps organizations cut through the clutter and hone in on what really matters."

Radiance allows organizations to connect, enrich, analyze and visualize millions of documents from disparate sources in a single user interface. With a powerful search engine and a library of advanced visualizations – including social networking, communication patterns, concept clustering and timelines – Radiance can aid organizations in a number of common use cases, including investigations, early data assessment and the identification of high-risk data, such as personally identifiable information. Radiance was launched in January 2016 and provides a natural complement to FTI Consulting's Ringtail® E-Discovery Software.

FTI Consulting and FTI Technology are consistently recognized for excellence in legal and information governance software and services, including acknowledgment by *The National Law Journal, The Legal Intelligencer, The Recorder, KMWorld Magazine, Computer Technology Review and Legaltech News, among others.* For more information on FTI Technology or Radiance, please visit FTI Technology's website .
