

FTI Technology Named to 100 Companies That Matter in Knowledge Management List by KMWorld Magazine

March 14, 2013

E-discovery Leader Recognized for Innovative Solutions to Meet Today's Information Challenges

WEST PALM BEACH, Fla., March 14, 2013 /PRNewswire/ -- [FTI Consulting](#), Inc. (NYSE: FCN), the global business advisory firm dedicated to helping organizations protect and enhance their enterprise value, today announced that for the third time its FTI Technology practice has been named to *KMWorld* magazine's 100 Companies That Matter in Knowledge Management list. Knowledge management practitioners, theorists, analysts, vendors, customers and colleagues helped select the vendors that exhibited innovation and adaptability.

"Criteria for inclusion vary, but all companies have characteristics in common. Each has either helped to create a market, redefine one or enhance one, and they all share two strengths — the velocity of innovation and the agility to serve their customers," said Hugh McKellar, *KMWorld* Editor-in-Chief. "FTI Technology continues to demonstrate its leadership in the e-discovery market through new software and service offerings that help clients meet their e-discovery challenges."

As an example of the company's continuing innovation, FTI Consulting has launched the following e-discovery offerings over the past six months:

- [Ringtail@ SaaS](#): The easy-to-use Ringtail software now can be accessed and managed in a secure, self-serve private cloud and offers improved review workflow and other management tools to support faster and more accurate legal reviews for the company's global corporate, law firm and government Ringtail users. With the addition of the SaaS offering, Ringtail users have a complete spectrum of options for handling e-discovery matters of all sizes, including a do-it-yourself approach using on-premise or SaaS software, a completely outsourced do-it-for-me managed service model, or a Ringtail SaaS model based on the right combination of software and services to meet the client's specific requirements.
- [Predictive Discovery](#): Combining leading-edge analytics and machine-learning technologies with optimal workflows, Predictive Discovery accelerates the review and production of documents for commercial litigation and regulatory investigations. Predictive Discovery is a complete solution that brings together the software and services required for success with any predictive coding project or task such as prioritizing important data, eliminating irrelevant information and conducting quality control on human reviewers.

"A smart e-discovery strategy is an essential component of any successful corporate information governance program, and FTI Technology is focused on offering the right combination of software, services and consulting to address the long-term e-discovery needs of our clients," said Seth Rierson, Senior Managing Director and Global Practice Leader of [FTI Technology](#). "We're honored to be recognized by *KMWorld* magazine for our thought leadership and continuing innovation in helping clients with their information governance challenges."

Through its comprehensive portfolio of e-discovery software, services and consulting, FTI Technology is transforming the way organizations globally manage e-discovery for legal and regulatory events. From its award-winning [Ringtail](#) software to its [Acuity](#)™ managed review service and Predictive Discovery solution, FTI Technology helps clients streamline the entire e-discovery process and provides a single point of e-discovery accountability. Altogether, FTI Technology provides a smart and comprehensive approach to improve the e-discovery process, contain costs without cutting corners and manage critical enterprise information demands.
