

FTI Consulting, Inc. Announces Tiff-on-the-Fly™ Add-on Module for Ringtail® Legal 2005™ Document Review Technology

July 19, 2007

Integrated technology dramatically improves efficiency of document review and production

New York, NY - July 19, 2007

FTI Consulting, Inc. (NYSE: FCN) the global business advisory firm dedicated to helping organizations protect and enhance their enterprise value, today announced the launch of the Tiff-on-the-Fly™ add-on module for its Ringtail® Legal 2005™ document review technology. Developed to reduce the time and expense of document-intensive processes, the industry-leading Ringtail Legal 2005 web-based technology delivers cost and time savings to attorneys working on complex litigation and investigations.

With the increase in native file productions brought about by the new Federal Rules of Civil Procedure, the standard in litigation today is to convert only those documents requiring redaction into TIFF image files prior to redaction and production. This approach saves time and expense from the "TIFF everything" approach, but requires the use of an outside vendor for the TIFF conversion.

The Tiff-on-the-Fly module allows Ringtail users to convert native file documents into TIFF image files for redaction and production within the Ringtail environment—dramatically reducing lag time between review, redaction and production, and increasing attorney review efficiency. By utilizing the Tiff-on-the-Fly module, law firms, and companies can eliminate the step requiring the outsourcing of image file creation to a vendor—shaving hours or days off the overall document review process.

"Firms looking to improve the control of the electronic discovery process should look to those technologies that reduce or shorten steps and improve the efficiency of attorneys," said Deb Logan, research vice president at Gartner.

"Adding the Tiff-on-the-Fly capability to our in-house installation of Ringtail provides significant benefits to our firm and our clients," said Mark Brennan, counsel at Bryan Cave LLP. "We are already seeing substantial streamlining of document production workflow and internal control of the entire document review and production process will save significant time and effort."

"Real World" Cost Savings

Allen & Overy LLP ("A&O"), one of the world's largest law firms, recently used Ringtail with Tiff-on-the-Fly to process millions of paper and electronic files during a complex, multi-jurisdictional litigation. By streamlining the document review by only TIFFing relevant documents, coupled with the removal of outsourced vendor assistance, the project timeline was reduced. In all, of the 2.7 million files (15 million pages) originally imported, only 39,000 were converted to TIFF, resulting in an estimated \$1.3 million saved on A&O's TIFF format production costs.

"When it comes to the handling of intricate, high-profile litigation spanning a multitude of jurisdictions, simplification and efficiency in the document review process is of the utmost importance," said Lanier Saperstein, an attorney in A&O's New York office. "By utilizing the fully-integrated Ringtail with Tiff-on-the-Fly, we were able to eliminate the time associated with shipping native files to a third party processing vendor enabling us to maximize attorney review time and adhere to a tight schedule."

Tiff-on-the-Fly is available as an add-on for the installable version of Ringtail Legal 2005 and includes a console for system administrators to manage jobs, reports, users, configuration settings and licenses. Tiff-on-the-Fly capabilities are also available on FTI's hosted Ringtail ASP.

"The Tiff-on-the-Fly module adds a significant tool to Ringtail's set of essential features designed to reduce electronic discovery costs and increase document review efficiency," stated Seth Rierson, senior managing director in FTI Consulting, Inc.'s Technology segment. "A typical corporation or law firm using Ringtail with Tiff-on-the-Fly will likely recognize a full return on their investment within a very short time following implementation."
