

FTI Consulting Recognized as a Leader in the 2013 Magic Quadrant for E-Discovery Software Report

June 17, 2013

Leading Analyst Firm Evaluation Based on Ability to Execute and Completeness of Vision

WEST PALM BEACH, Fla., June 17, 2013 /PRNewswire/ -- FTI Consulting, Inc. (NYSE: FCN), the global business advisory firm dedicated to helping organizations protect and enhance their enterprise value, today announced that its FTI Technology practice has been included in the 'leaders' quadrant in Gartner's 'Magic Quadrant for E-Discovery Software' report (Debra Logan, Alan Dayley, Sheila Childs, June 10, 2013). Twenty-three software providers were evaluated in the report, and a complimentary copy of the report is available at the FTI Technology site.

"We're pleased that FTI Technology again is recognized by Gartner in the 'leaders' quadrant of the 'Magic Quadrant for E-Discovery Software,'" said Seth Rierson, Senior Managing Director and Global Practice Leader of FTI Technology. "From large, complex and multinational matters to day-to-day investigations and routine cases, our strategy is to help clients confidently and defensibly lower their total cost of discovery. Ringtail® software – highly scalable, easy to use with industry-leading visual analytics – is the foundation of this strategy."

According to the report, "Consolidation in the service provider market is under way and likely will continue. This is mainly being driven by the disintermediation of law firms, pricing pressure and the need to develop economies of scale in data management. We expect that the number of firms claiming to have e-discovery products and services will shrink by 25% during the next two years, with most of the attrition among service providers and the legal solution channel, not software vendors."

From its award-winning Ringtail® software to its Acuity™ managed review service and Predictive Discovery solution, FTI Technology helps clients streamline the entire e-discovery process and provides a single point of e-discovery accountability. Altogether, FTI Technology provides a smart and comprehensive approach to improve the e-discovery process, contain costs without cutting corners and manage critical enterprise information demands.
