- (1) Information concerning the selling securityholders may change from time to time. Any such changed information will be set forth in supplements to this prospectus if and when necessary. The amount of notes and the number of shares of our common stock issuable upon conversion of the notes indicated may be in excess of the total amount registered under the shelf registration statement of which this prospectus forms a part, due to sales or transfers by selling securityholders of such notes or shares in transactions exempt from the registration requirements of the Securities Act after the date on which they provided us information regarding their holdings of notes and such shares of common stock.
- (2) For purposes of presenting the number of shares of our common stock beneficially owned by holders of notes, we assume a conversion rate of 31.9980 shares of our common stock per \$1,000 in principal amount of notes, which is equal to an initial conversion price of \$31.25 per share. However, the conversion price is subject to adjustment as described under “Description of the Notes—Conversion Rights.” As a result, the number of shares of common stock issuable upon conversion of the notes, and as a consequence, the number of shares beneficially owned by the holders of notes, may increase or decrease in the future.
- (3) This selling securityholder has advised us that it is a registered broker-dealer. Accordingly under interpretations by the staff of the SEC, this selling securityholder may be deemed to be an “underwriter” within the meaning of the Securities Act. This selling securityholder has advised us that it purchased the securities reflected in this table as being owned by it and offered for sale for investment purposes and that such securities were not acquired as compensation for underwriting activities.
